

Audit

Introduction

Purpose of the audit:

The purpose of the audit would be to determine compliance with the protocol. It provides the interprofessional team with an indicator of whether the protocol is working and can identify the need for more training. It can be used to share results with staff from time to time.

When to do the audit:

The audit could be carried out at 3 months and 6 months post implementation; and/or at another time when the implementation team requires more information regarding progress.

Who could carry out the audit?

Members of the implementation working group or other champion staff representative of the interprofessional team. As well if available, students may also be involved.

See Appendix I for Sample Audit.
