

STROKE RESOURCES: HELPFUL LINKS

Evidence Based Review of Stroke Rehabilitation (EBRSR)

www.ebrsr.com

The EBRSR is an up-to-date, easily accessible evidence-based review of the stroke rehabilitation literature, originally produced as a result of a vision for integrated stroke care in Ontario. This review serves to synthesize the results from over 3,500 studies evaluating the effectiveness of stroke rehabilitation interventions, including a careful evaluation of over 1,400 randomized controlled trials.

Stroke Engine

www.strokingengine.com

Designed for families and health professionals who work in the field of stroke rehabilitation, the goal of this site is to bridge the gap in knowledge translation between research findings and current clinical practice. It can be used to find the most current information about the value of the various interventions used in stroke rehabilitation as well as psychometric and pragmatic properties of assessment tools used in stroke rehabilitation.
