TRUE/FALSE Questions

(circle the correct letter)

- T F 4. Once you have assessed the patient's abilities to perform basic ADLs, you don't have to assess again.
- T F 5. Premorbid education, learning and cognition are not factors to consider with performance of ADLs after a stroke.
- T F 6. When required, opting in to assist the patient in performing ADLs is necessary to maintain effort, motivation and dignity for the patient.
- T F 7. Scheduling family members/caregivers to train and practice ADLs is an effective means to assist with transitioning the patient to their home and community post-hospital discharge.
